3. Operations

Our Production during the year was slightly lower than the previous year. The overall economic industrial climate was unfortunately sluggish. Electrical Equipment Manufacturing Industry and Capital Goods Sector registered negative growth. Increasing import of electrical equipments from China, affected Domestic Industry.

Inflation, High cost of finance, lower capacity utilisation, inadequate availability of proper Grade fuel and issues pertaining to environmental clearances affected overall fiscal, economical and Industrial climate in the country.

Considering the prevailing adverse economical climate in the country during the year under Report, your Company has performed well.

The PBDIT is 3774.05 (4152.10) Finance charges 286.78 (506.85). Depreciation 1181.01 (1257.41) PBT 2306.26 (2387.84) Provision for Tax 862.07 (792.41) and PAT 1444.19 (1595.43) lacs which is slightly lower than previous year due to high volatility in USD/INR during QII of the Year, more imports of input, higher Employees Benefits Expenses, Insurance & freight and other expenses. Our Reserves and Surplus (excluding Revaluation) are about Rs.19154 (19063) at the end of March 2014.

Since our Winding Wires are used in the manufacture of Electrical Equipment, Long term prospect for the Industry is bright. Manufacturing -Sector also is likely to be given priority as the same generates more employment. Growth in Infrastructure-Sector such as Air Ports, Metros, Highways, surface Transport etc. besides the Power-Sector, is likely to have catalytic impact on Capital-Goods-Sector.

Notwithstanding whatever has been stated in the foregoing paragraphs, your Company continues to be optimistic about future growth in the sector. India, being a power-deficit country, long term prospects of the Electrical Equipment Manufacturing Industry is bright. Since around 40 crore people in our Country do not have access to electricity, Power-Sector enjoys utmost priority. Between now and 2050 Indian electricity supply and demand are projected to increase five-fold.

Inherent distortions arising from rapidly increasing trade deficit has attracted attention of the Government and remedial measures have been taken.

Prevailing adverse economic climate in the country is bound to change for the better and your Company is hopeful for upturn in the Economy. Your Company has been performing consistently well and continues to be the Market-leader with low-debt-gearing, Debt-Equity Ratio less than 0.25, and Current Ratio at about 1.44.

We have discharged all financial obligations in time, without delay or default.

MANAGEMENT DISCUSSION & ANALYSIS

a) Industry Structure & Development:

The Company produces Winding Wires made of Copper which are used in the manufacture of both rotating and static electrical equipments. Though there are number of players in the Industry including many in SSI sector, due to quality of our products and long standing relationship with OEM customers, we continue to remain Industry-Leader. Despite adverse operational conditions prevailing in the country, we have performed well.

The overall capacity utilization of the Industry in the Country is marginally lower than the previous year. This is due to the sluggish demand from Electrical Equipment Manufacturing Sector which did not have adequate orders from Electric-Power-Sector and infrastructural projects. Both Industrial & economic structure of the Industry remains affected due to high Cost of input, inflation, substantial volatility in Forex. Your Company continues to cater to the OEM sector. Emphasis on direct physical export abroad continues.

b) Opportunities & Threats:

As ours is a power-deficit country, massive investment in the power sector, is likely to continue. Government has ambitious plans for increasing installed capacity for electric power generation rapidly. Constraints such as high cost of finance and availability of proper grade of fuel, improving electrical transmission and distribution network are on the fast track agenda of the Government. This will induce the growth in both Electrical Equipments/Capital goods Sector. Since your Company continuous to cater primarily to OEM Sector, the prospect for the Industry is good. As demand of electricity is substantially higher than production in our country, there is no other way, but to resort to faster growth by providing adequate resources, reorientation in the policy matters.

The living standard of the people in the country is generally improving so also the Industrial Development & combined effect thereof will anyhow force the accelerated growth of Electric-Power-Sector and consequently that of Electricity Equipment Manufacturing and Winding Wire Sector.

However, due to economic downturn at home, and inadequate availability of proper grade coal required, and high cost of fuel for thermal power generating Stations, implementation of such undertaking by large Private Sector firms has been delayed. Foreign Direct Investment (FDI), as expected, has also slowed down considerably. Rapidly increasing Trade deficit generates pressure on our Currency, which fuels inflationary cycles. Imports of electrical equipments are high through FTA/PTA route, despite availability of capacity in domestic-manufacturing-sector.

Though the Government is seized of the issues, some genuine constraints for time being exist. These factors may be temporarily non-conducive for the fast track growth but reorientation of policy is imminent. Ultimately increasing paucity of electric power in the Country shall activate the reorientation in the policy. However, it may take atleast a year or more for the Economic activity to revive.

Substitution of copper by aluminum, in small rotating and static electrical equipments is visible. Before making sizable new investment, your company would like to explore in-depth.

Operating conditions, during next two years may pose interesting challenges, competition may continue to be intense; however, we are well equipped to face, due to our low-debt-gearing and considerable experience in the industry.

c) Segment-wise or Product-wise performance:

The Company's core activity is production and sale of only one product i.e. Winding Wires made of Copper. Despite adverse operating condition, we have almost maintained production level. Sale income is marginally higher. Profit during the year under review is lower than the previous year.

Our emphasis on export continues. Our insulating varnish division at Palej continues to operate satisfactory and provides important contribution to the quality of our finished product.

d) Outlook:

Long Term outlook of the Indian Economy, and consequently, electric-power-sector is healthy.

e) Risks and concerns:

Please refer to foregoing paragraphs.

f) Internal control systems and their adequacy:

Commensurate with the size of your Company and the nature of its business, your Company has adequate internal control procedures and regular Internal Audit systems. This has been confirmed by the Auditors in their report to the members.

g) Discussion on Financial Performance with respect to Operational performance (All figures rounded off in Rupees Lacs only):

Reserve and surplus (excluding revaluation) increased to 19154[19063].

Debt / Equity ratio less than 0.25.

Subject to the approval by Members at the ensuing AGM, the Year under review, being the 25th Year of the Company (The Jubilee Year), Total Dividend declared is 100%, on Fully paid equity shares. Out of which, till now 80% has been since paid as interim dividend and further 20% has been recommended as Final Dividend in the last Meeting of the Board of Directors.

During the year under review, our production was slightly lower than last year. Gross Revenue from operations increased marginally.

Finance cost 287[507], Depreciation and amortization expenses 1181[1257] were lower.

Inflation and more direct exports resulted into higher expenses for freight/transportation, 948[926].

Other expenses are 6193[5752], mainly due to higher expenses on foreign exchange loss 236(50) and other expenses 1275(1032).

Employees Benefit Expenses were higher at 1446[1356] due to full-year impact of the wage Agreement revised last year. These include contribution to provident fund and bonus etc.

Long term borrowing was lower at 305[791].

Short term borrowing 4624[8217], Trade payables 14166[17732] and other current liabilities 1821[4056].

Your Company's financial performance is satisfactory and considering the low economic activity in the country, operational performance is good.

Your Company continues to be market leader in the field of Winding Wires made of Copper in India. The Company has discharged all financial obligations in time on due dates, without any default or delay.

h) Material Developments in Human Resources / Industrial Relations including number of people employed:

Industrial relations during the year were generally satisfactory and new wage agreements with the labour at Silvassa Plants have been concluded.

i) Cautionary Statements:

Statements in this Management Discussion and Analysis describing the company objectives, estimates and expectations may be Forward Looking statements within the meaning of applicable laws and regulations. Actual performance may differ substantially or materially from those expressed or implied.

**NOTE 26 : SIGNIFICANT ACCOUNTING
POLICIES AND NOTES ON ACCOUNTS**

A. SIGNIFICANT ACCOUNTING POLICIES
1. Basis of Preparation of Financial Statements :

The Financial Statements have been prepared under the historical cost convention in accordance with generally accepted accounting principles and comply with the mandatory accounting standards issued by the Institute of Chartered Accountants of India and the provisions of the Companies Act, 1956, as adopted consistently by the Company.

2. Use of Estimates :

The preparation of financial statements in conformity with GAAP requires the management of the Company to make estimates and assumptions that affect the reported amounts of income and expenses of the period, the reported balances of assets and liabilities and the disclosures relating to contingent liabilities as of the date of the financial statements. These estimates are based upon management's best knowledge of current events and actions. Difference if any between the actual results and estimates is recognised in the period in which the results are known.

3. Fixed Assets and Depreciation :

- i. Fixed Assets are stated at cost, net of Cenvat credit, where applicable, less accumulated depreciation and impairment losses. Cost includes financing and other costs incurred for bringing the assets to its working condition for the intended use. Borrowing costs related to the acquisition or construction of the qualifying fixed assets for the period up to the completion of their acquisition or construction are capitalised. Cost of fixed assets not ready for their intended use before such date are disclosed under capital work in progress.
- ii. Depreciation on Fixed Assets (except those described below) is provided on the Straight Line Method at the rates not less than those specified from time to time in Schedule XIV to the Companies Act, 1956, which management considers as being representative of the useful economic life of such assets:

The management estimates the useful life of certain assets as follows :

Office Equipments	5 years
Computers	3 years
Furniture and Fixtures	5 years
Technology Transfer Cost is amortised over a period of 6 years.	

- iii. Depreciation on additions to assets or on sale of assets as the case may be is calculated pro-rata from the month of such addition or upto the month of such sale.
- iv. Assets scrapped / discarded from use and held for disposal, if any, are stated at lower of book value or their estimated net realisable value.

4. Impairment of Assets :

An asset is treated as impaired when the carrying cost of assets exceeds its estimated recoverable value. The recoverable amount is greater of the Assets' Net Selling Price and Value in Use. An impairment loss is charged to the Profit and Loss Account in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

5. Investments :

Investments that are readily realisable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long term investments. Current investments are carried at lower of cost and fair value. Long term investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary, if any, in the value of the investments.

6. Inventories :

- i. Inventories are valued on FIFO basis at lower of cost or estimated net realisable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.
- ii. Cost of Work in progress includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity.
- iii. Closing stock of finished goods includes Excise duty payable thereon wherever applicable.

7. Excise duty / Service Tax :

Credit availed of Excise duty / Service Tax paid on inputs is reduced from the cost of material / services and is carried forward in Current Assets, Loans and Advances pending utilisation.

8. Income and Expenditure :

- i. Revenue / Income and Cost / Expenditure are generally accounted on accrual basis as they are earned or incurred, except those with significant uncertainties.
- ii. In cases where duty paid materials are consumed prior to duty-free import of material for manufacture of products for export, the estimated excess cost of such material over that of duty free materials is carried forward and charged to revenue on consumption of such duty-free materials.
- iii. Sales are recognised at the point of despatch of goods to the customers. Sales are net of discounts, Sales Tax / VAT and Sales Returns.
- iv. Interest income is recognised on time proportion basis.
- v. Dividend on Investments is accounted when received.
- vi. Insurance claim receivable is recognised in the year of the loss to the extent ascertainable.

**NOTE 26 : SIGNIFICANT ACCOUNTING
POLICIES AND NOTES ON ACCOUNTS**

9. Foreign Currency Transactions :

- i. Monetary assets and liabilities related to foreign currency transactions remaining unsettled at the end of the year are translated at year end rates. Non Monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of transaction.
- ii. The difference in translation of monetary assets and liabilities and realised gains and losses on foreign transactions are recognised in the Profit and Loss Account.
- iii. Premium or discount on forward contracts are amortised over the life of the contract. Foreign Exchange Forward Contracts are re-expressed at the Balance Sheet date and Exchange difference between the spot rate at the date of contract and spot rate on the Balance Sheet date is recognised as gain/loss in the Profit & Loss Account, in terms of pronouncement of the Institute of Chartered Accountants of India.

10. Derivative Instruments :

The Company uses forward contracts to hedge its risks associated with foreign currency fluctuations relating to firm commitment contracts and highly probable forecast transactions. The Company designates such forward contracts in a cash flow hedging relationship by applying the hedge accounting principles set out in "Accounting Standard 30 Financial Instruments: Recognition and Measurement". These forward contracts are stated at fair value at each reporting date. Changes in the fair value of these forward contracts that are designated and effective as hedges of future cash flows are recognised directly in "Hedging reserve account" under Reserves and Surplus, net of applicable deferred income taxes and the ineffective portion is recognised immediately in the Statement of Profit and Loss. Amounts accumulated in the "Hedging reserve account" are reclassified to the Statement of Profit and Loss in the same periods during which the forecasted transaction affects profit and loss. Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. For forecasted transactions, any cumulative gain or loss on the hedging instrument recognised in "Hedging reserve account" is retained until the forecasted transaction occurs. If the forecasted transaction is no longer expected to occur, the net cumulative gain or loss recognised in "Hedging reserve account" is immediately transferred to the Statement of Profit and Loss.

In accordance with Accounting Standard 11 ["Effects of changes in Foreign Exchange Rates"] and Accounting Standard 30 ["Financial Instruments – Recognition and Measurement"] as also Accounting Standard 16 ["Borrowing Costs"] issued by the Institute of Chartered Accountants of India, on the Buyers Credits in Foreign Currency availed from time to time up to the time of their settlement or up to the time of creating hedge thereagainst, the Foreign Exchange Gain / Loss applicable on the amount of difference in borrowing cost in Indian Currency and borrowing cost of Buyers' Credits in Foreign Currency is accounted as "Applicable loss on foreign currency transactions and translations" under Finance Cost in the Profit and Loss Account.

11. Employees Benefits :

- i. "Gratuity Benefits are accounted for on the basis of amount determined by actuarial valuation made by Life Insurance Corporation of India (LIC) using the Projected Unit Credit Method and are funded accordingly by the approved Trust. Contribution made to LIC is charged to Profit and Loss Account. Actuarial gains and losses arising from experience adjustments and change in actuarial assumptions are recognized in the Profit and Loss in the period in which they arise".
"In respect of certain employees who are not covered under approved Gratuity Fund, the liability is determined on the basis of Actuarial Valuation and is charged to Profit and Loss Account".
- ii. The Company's provident fund and pension scheme are in form of defined contribution plans where contribution is made to funds / Government managed schemes. These are accounted on accrual basis and charged to the Profit and Loss Account of the year in which the employee renders the related service.
- iii. The monetary value of leave encashment benefit is provided on the basis of actuarial valuation.

12. Taxes on Income :

In accordance with Accounting Standard AS 22 - Accounting for Taxes on Income, issued by the Institute of Chartered Accountants of India, the deferred tax for timing differences between the book and tax profits for the year is accounted for using the tax rates and the laws that have been enacted or substantively enacted as of the balance sheet date. Deferred Tax assets arising from temporary timing differences are recognised to the extent there is reasonable certainty that the asset can be realised in future.

13. Provisions, Contingent liabilities and Contingent Assets:

Provisions are recognised for liabilities that can be measured only by using a substantial degree of estimation, if

- (a) the company has a present obligation as a result of a past event
- (b) a probable outflow of resources is expected to settle the obligation; and
- (c) the amount of the obligation can be reliably estimated.

Contingent liability is disclosed in case of

- (a) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation
- (b) a present obligation when no reliable estimate is possible
- (c) a possible obligation arising from past events where the probability of outflow of resources is remote.

Contingent Assets are neither recognised, nor disclosed.
